THE KINCAID DIFFERENCE

SOLID WOOD CONSTRUCTION

Genuine solid wood is used on all exterior panels and shaped edges to provide quality and beauty that will last for generations. Kincaid does not use veneers, which are susceptible to cracking and peeling over time.

Many furniture manufacturers only use solid wood on drawer fronts, while the remainder of the product is veneer over particleboard. Edges are typically "banded" with a strip of solid wood to simulate solid wood construction, but below the veneer is particleboard.

MORTISE AND TENON JOINTS

Kincaid's case construction features mortise and tenon joinery, a time-proven method of assembling two parts at a 90° angle.

FLOATING TOPS

Fully floating tops, end panels, bed panels, etc. are incorporated into every Kincaid product to allow for normal expansion and contraction of the solid wood components as the humidity changes in your home.

ADJUSTABLE GLIDES

Adjustable glides are provided on all units for leveling doors and on select units for a center support.

DRAWER GLIDES

For Elise collection, we offer a full-extension whisper-quiet drawer glide mechanism that allows a gradual, soft close to all drawers.

DOVETAILING

Kincaid's dovetail drawer construction utilizes the best dovetail for each application. English dovetails on the drawer front and back create a tight fit and add exceptional holding power.

FLOATING PANELS

Raised panel doors and bed panels utilize a floating, self-centering construction technique.

FRONT POSTS

Where the design allows, heavy front posts are used for additional case stability and strength.

SOLID WOOD EDGES

Shaped edges are constructed of solid wood, unlike many manufacturers who use banded veneers, to provide premium quality and durability.

Kincaid, in keeping with its tradition in styling, materials and finish, crafts its furniture collections using primarily solid woods selected for grain clarity, color coordination and design. Combinations of different solid wood species are used within each collection. Not all exposed surfaces of every collection are constructed of solid wood. Wood products, multi-layered plywood, veneers and laminates are used for certain structural elements, including exposed surfaces that support leather, cane wicker and other non-wood materials, as well as in select components including some decorative table tops, table skirts, bed rails, interior surfaces, back panels, pullout trays, serving surfaces, etc. Some of our furniture features metal, stone, marble, granite or a composite material with the appearance of these elements.
