CONSTRUCTION FEATURES

When it comes to our process, we have it down to a fine art. Always mindful of keeping the natural appearance of our wood, we reinforce boards, sand them down, and then stain and shade them to obtain the desired color tone giving the furniture a one-of-a-kind appearance. Aiming to bring out wood's natural beauty, our goal has always been the same: when your new dining room centerpiece arrives at your door, that it exceeds your expectations and gives you the same feeling of pride and joy we had in creating it.

CANADEL'S EXCLUSIVE PROTECTION

*Canadel has developed a unique protection
made with a catalyzed lacquer base.*

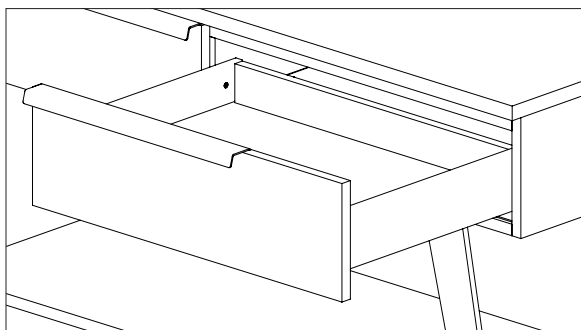

CORNER BLOCKED

All chairs have corner blocks on all four sides—blocks attached with glue and a bolt for a tight joint and added frame strength. They are designed and tested to a capacity of 450 pounds.

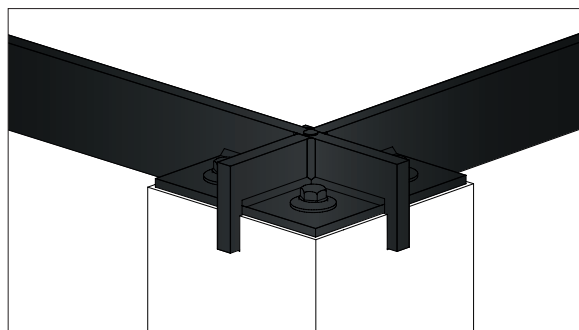

MORTISE AND TENON

The strongest and stable joints. No screws are needed, it is assembled with glue.

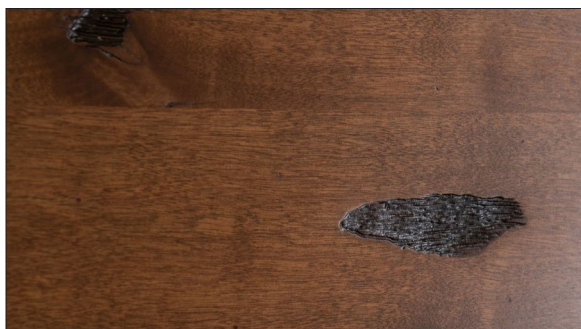

DRAWER

East Side drawer units have metal sides and a melamine bottom. They also have soft-closing slides.

METAL

The metal used in this collection is black, textured and has a matte finish.

EAST SIDE FINISH

The East Side distressed finish is more subdued than the rustic finish. The natural characteristics are highlighted and finished with our own tools and techniques.

GLIDE

Teflon glides are used on most of our chairs, stools and benches. They are securely nailed to each leg, make moving furniture around on wooden, ceramic, and even carpeted floors easier, and provide excellent protection.
